

- Innovative 2 Line HIFU Technology (2 Line Irradiation)
- Halved treatment time with 2 line HIFU
- Consistent dot reduces pain
- Auto stop system when transducer stops moving
- Reducing cartridge surface inflation prevents focusing on epidermis
- Similar effect in comparison with Ulthera based on preclinical study at Dankook University Hospital of Dermatology

## 2 Line HIFU

Shortened treatment time :  
**10THERA 200 shots, similar effect as 400 shots for other HIFUs**

## 10THERA Effect & Technology

### \*Dankook University Hospital of Dermatology preclinical test completed

A comparative preclinical study on micropig on the safety and effectiveness of 10Thera & Ulthera  
Testing institution: Department of Dermatology, Dankook University College of Medicine, College of Medicine / Testing period: 2020.5.1~2020.7.31  
Test results: The efficacy and safety of 10thera and Ulthera can be said to be similar based on the results of a study in pig skin with properties similar to human skin.

### \*Patent registration number: 1017778250000

Dual HIFU-based skin and obesity care device that can simultaneously output energy to multiple layers of skin
