ONE THERA

This product is not a medical device.
It is a reference material to help understand the product.

ONE THERA

DUAL MODE ULTRASOUND SYSTEM

What is One Thera?

One Thera is a device that delivers concentrated thermal energy to the dermis and fat layer of the skin through various types of cartridges. It can be used for both FACE & BODY, and it is recommended to select a cartridge and mode suitable for the area to be used and operate in an optimal way.

Normal mode & Long pulse mode

Normal: Delivers thermal energy to the desired skin layer
 Long pulse mode: Transmits thermal energy deeper

- Approximately 4 minutes for 3,000 shots up to 12Hz speed
- Various applications possible by using two modes

01 When can I see the results?

Normal: Delivers thermal energy to the desired skin layer
 Long pulse mode: Transmits thermal energy deeper

02 How often can I receive it?

Depending on the individual, you can expect immediate results immediately after use, and you will see better results after 2 to 4 weeks.

03 How is the pain level?

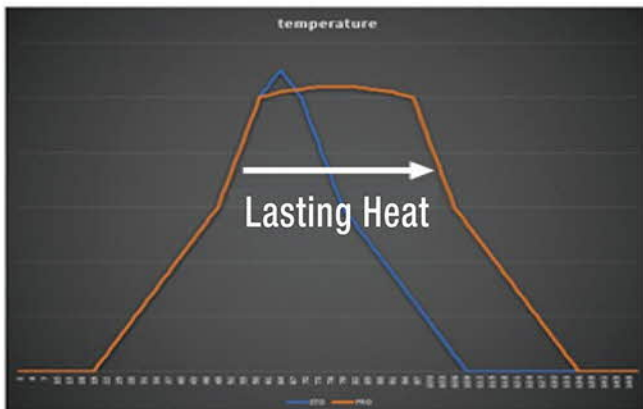

Depends on the individual, but generally it is a tingling degree of pain. If you are sensitive to pain, lower the energy level.

04 What are the precautions?

If the skin is red, it usually subsides on the day of treatment. It is recommended to refrain from sauna, drinking, and smoking for 3 to 5 days after the procedure.

Long Pulse Mode?

Technology that divides one pulse into multiple pulses to deliver deep heat and further reduce pain.
